From a beneficiary's perspective

- As seen from the video, other people are often discouraged to implement these schemes because of the delays in benefit transfers to beneficiaries.
- Suggestion:
When conveyed the same to DM, we got to learn about the delayed funding to the district under MGNREGS.
So we suggest there can be monetary transfers in phases to the beneficiaries.
- Other grievances include:
When talked with other households also we came across the lack
of awareness about the schemes.
- Lack of awareness campaigns in the village.

Suggestions

- There should be speed breakers on the village main road specially near the school.
- School need better infrastructure like more benches, better colouring, etc for lively environment in classrooms.
- Aanganwadi need playing equipment like swings, toys, and compound should be children friendly, quality of rice should be changed.
- Elders of the village expressed the need for a public library, Gymnasium and sports amenities especially for the youth.

THANK YOU
