

WATER SUPPLY

WASTAGE & CONSERVATION OF WATER

Reasons for Waste of Water:

- The wastage of water on to the roads is due to the cleaning of their residences, vehicles, washing of clothes and cleaning of utensils during the supply time.
- Due to not having sufficient storage capacity, as such after the usage of water the balance water is let on the roads

Reasons for Waste of Water

- Due to non-fixing of taps
- Initially contaminated water
- Due to in equitable water quantity at the same time supply time increased.
- Open taps in locked houses
- Discipline enforcement is not possible
- No bare land to percolate water.

RESPONSIBILITY AND FUNCTIONS OF THE COMMITTEE MEMBERS ON WATER CONSERVATION

- Educate the Consumers to clean the premises /vehicles with wet cloth instead of water.
- To ensure fixing up taps.
- Encouraging construction of rain water harvesting pits.
